

Serial No. 10/820,288
Docket No. VAP023PA (Formerly VSTI-12U)

Listing of Claims:

Claims 1-14 (Canceled)

Claim 15 (New): A nozzle configuration compatible with ORVR equipped vehicles, said nozzle configuration comprising:

- a nozzle body having a pressure sensitive shut-off diaphragm;

- a spout having a first end connected to said nozzle body and a second end, said spout being inserted into a vehicle filler pipe so that fuel can be dispensed from said second end of said spout into said filler pipe;

- a vacuum generator for generating vacuum while fuel is dispensed by the nozzle;

- a vapor recovery path extending through said nozzle body;

- a first passageway having a first end leading to a first side of said shut-off diaphragm and a second end leading to said second end of said spout, said first passageway being coupled to vacuum generator; and

- a second passageway having a first end leading to a second side of said shut-off diaphragm and a second end leading to said vapor recovery path within said nozzle.
